

NEPAL 2015 EARTHQUAKE BIBLIOGRAPHY OF NEPALI MEDIA ARTICLES (April 2015-December 2016)

Introductory note

This bibliography provides a comprehensive listing of all substantive op-ed articles on the Nepal earthquakes of 2015 that were published in Nepali newspapers between the date of the initial earthquake (25 April/12 Baisakh) and the end of 2016. Reportage and bare reports of events have not been included.

The bibliography has drawn on many sources but particularly on the bibliography of newspaper and periodical articles from April 2015 to April 2017 compiled by Rukh Gurung for Martin Chautauri. This includes articles from both the Nepali-language press (*Annapurna Post, Kantipur, Gorkhapatra, Naya Patrika, Nagarik, Nepal, Himal Khabar Patrika, Shikshak, Ajako Mulyankan, Annapurna Today, Rajdhani*) and English-language media (*República, The Himalayan Times, The Kathmandu Post, Nepali Times, Himal Southasian*). A number of titles have also been extracted from the general listing of writing on Nepal regularly updated by Karl-Heinz Kraemer and available at <http://nepalresearch.org/bibliography.html>.

Nepali titles are given in Devanagari but integrated with English-language items and alphabetised on the basis of contemporary Nepali pronunciation rather than Sanskrit phonology. All Nepali titles have been translated into English, and dates for all Nepali-language publications have been given in both Nepali and western styles. The SWAY project acknowledges the great deal of hard work done by our project administrator Sunil Pun to give this bibliography its final shape and form.

Many, but not all, of these articles may be accessed via the SWAY Digital Library at <https://digital.soas.ac.uk/SWAY>. Others are still archived on their publishers' websites. Otherwise, most of these newspapers and magazines have been archived in hard copy in the Martin Chautari Media Library (<http://www.martinchautari.org.np/index.php/library>)
